

Factsheet

SMART Board™ interactive whiteboard

Succeed with active learning

The SMART Board™ interactive whiteboard has a large, interactive screen on which you and your students can explore a website, give a science presentation or take a virtual field trip. It helps you improve student motivation and performance by making inquiry-based learning a dynamic classroom experience.

The key to this experience is touch. You simply touch the surface to select menus and icons. To write notes, pick up a pen, and write with either the pen or your finger. You don't need batteries or special tools that fail or go missing.

The expansion slot allows you to add other SMART products to your board, such as the SystemOn button, so you can upgrade your hardware whenever you need to.

Reach all students

The SMART Board interactive whiteboard meets the needs of both visual and kinesthetic learners. Students see large, vibrant images and physically interact with material by moving letters, numbers, words and pictures with their fingers. Students with special needs can see, read and manipulate information more easily.

Give dynamic whole-class instruction

With the interactive whiteboard, you have powerful preparation tools and a central focus in class. Before you teach, you can plan lessons at your desktop. The whiteboarding software includes curriculum-specific clip art and templates that support math, literacy and science. You can build a lesson on graph paper, a music sheet or a map of Africa. In the class, you can involve students, add notes and save all information, every step of the way. With the SMART Board interactive whiteboard, you'll save time and increase success – for every one of your students

Touch the interactive whiteboard to control computer applications – your finger becomes the mouse.

Dimensions

Active screen size

Wide format

Model	area (diagonal)
690	94" (238.8 cm)
685	87" (221.0 cm)

Standard format

Model	area (diagonal)
680	77" (195.6 cm)
660	64" (162.6 cm)
640	48" (121.9 cm)

Features

- 1** Touch-sensitive surface
- 2** Expansion slot
- 3** Pens
- 4** Eraser
- 5** On-Screen Keyboard, right mouse and help buttons Eraser and pens
- 6** SMART Pen Tray
- 7** USB connection

Key features

- **Touch system** – Write, erase and perform mouse functions with your finger, a pen or an eraser – you need no proprietary tools.
- **SMART Pen Tray** – Pick up a pen or the eraser, and the pen tray automatically detects which tool you've selected. Buttons activate the On-Screen Keyboard, right-click and help function.
- **Digital ink** – Write in digital ink over applications, websites and videos.
- **Save function** – Capture your work to SMART Board software as a screen shot that you can edit, or save your notes directly into several software applications, including Windows versions of Microsoft® PowerPoint®, Word and Excel®, or AutoCAD® software.
- **Durable surface** – The hard-coated polyester surface is tear proof, optimized for projection, compatible with dry-erase markers and easily cleaned with whiteboard cleaner.
- **Active screen size** – Available in three standard sizes or two wide-screen formats.
- **Wall-mount bracket** – Install your SMART Board interactive whiteboard simply and securely.
- **USB cable** – Connect the SMART Board interactive whiteboard to your computer.
- **Expansion slot** – Use this interface to add future hardware, such as the SystemOn button.
- **Warranty** – Five years upon product registration, two years standard.

Optional accessories

- **Floor stand** – Mobile, height-adjustable floor stand that includes heavy-duty, locking casters and stabilizing safety guards.
- **USB speakers** – Two 15-watt, stereo-amplified speakers, with a two-port USB hub, that mount to the SMART Board interactive whiteboard or on the wall.

SMART delivers the most comprehensive and best integrated portfolio of premium software and content resources for educators.

SMART Notebook software

Notebook software provides the tools to create and deliver engaging and interactive lessons across all grades and subject areas.

- Create dynamic lessons using Notebook software's Gallery of thousands of vibrant, curriculum relevant images, video files and lesson activities
- Save files in various formats and e-mail them to students for review
- Write over moving or paused video, or record all screen activity as a video

SMART Learning Marketplace

The SMART Learning Marketplace, powered by the Global Grid for Learning, a Cambridge University Press company, is a content subscription service that allows you to quickly find and integrate digital resources into lessons.

- Access over a million copyright-cleared images, video files, audio clips and manipulatives
- Conduct a search directly from Notebook software or from the online search portal
- Insert professionally developed content from trusted content providers

Complementary resources

SMART Exchange

Access the free community network that provides a wealth of technology-enabled learning resources.

SMART-accredited titles

To ensure that you can find complementary multimedia content and software that works with your SMART Board interactive whiteboard and Notebook software, SMART accredits titles through the Software Accreditation Program.

Lesson activities

Created by educators for educators, SMART lesson activities are correlated to local curriculum standards for all core subjects.
