

The New Testphone 295B has just been launched. It is State of the Art Testphone with a 12 Number Memory Store, and an Integral ADSL Filter which ensures that the Phone will not cause interference when connected to ADSL/Broadband Lines. (Not Loudspeaker). This Testphone 295B has an advantage over other Testphone's which detect an ADSL/Broadband line and Lock the phones out, whilst our 295B can be connected to an ADSL/Broadband Line and it will not cause any interference or corrupt the data on the line.
