ADDITIONAL HANDSET

Dear customer

Thank you for purchasing our product. We hope you will enjoy using it. Please read this document before you start using your new DUALphone 3088 for Skype™. If you experience any difficulties, please consult our support centre at **www.dualphone.net**.

 Conformity of the telephone with EU directives is confirmed by the CE symbol. We hereby declare that the DUALphone 3088 comply with the essential requirements and other relevant provisions of the R&TTE Directive 1999/5/EEC. The declaration of conformity is available in the user manual at **www.dualphone.net**.

 The DUALphone 3088 is covered by the European Directive 2002/96/EC which indicates that this product should not be disposed of via the normal household waste stream. To prevent possible harm to the environment or human health, please separate this product from other waste streams to ensure that it can be recycled in an environmentally sound manner. For more details on available collection facilities, please contact your local government office or the retailer from whom you purchased this product.

In the box

- 1 cordless DUALphone handset
- 1 charging cradle for the handset with power supply
- 1 belt clip
- 1 Mini Quick Guide
- 2 batteries (AAA; rechargeable)
- 1 Safety and warranty sheet

Should anything be missing, please contact your place of purchase.

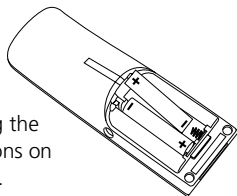

How to install the handset

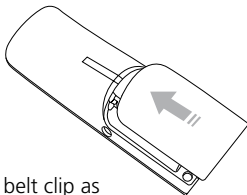

- 1) Push the top of the battery compartment cover on the back of the handset inwards and downwards.

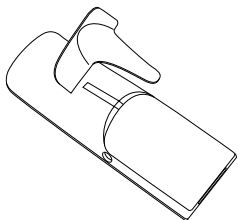

- 2) Insert the two batteries provided with the handset, making sure that their plus and minus ends are facing the same way as shown in the illustrations on the sides of the battery compartment.

- 3) Slide the battery compartment cover shut.

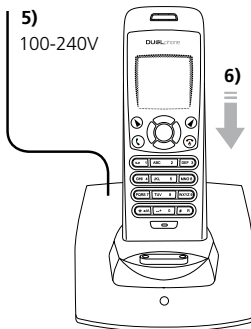

- 4) Affix the belt clip as illustrated.

- 5) Connect the power adapter of the charging cradle to an active power outlet.

- 6) Place the handset in the charging cradle to charge the batteries.

- 7) Wait for 10 minutes and the batteries will be ready for first-time start-up.

Notes:

- After completion of the full installation procedure we recommend that you charge the batteries fully before first use. This takes approximately 6 hours.
- Normally, you need to be within 50 m of the base station to connect successfully.

Register your handset

You must complete the following steps the first time you use your DUALphone. Start by turning on the handset by pressing  until the handset turns on.

Registration

Press reset button
on base station and
insert handset in
charger

- 1) Reset the base station by pressing the button on the back of the unit and insert the DUALphone in the cradle in order to register with the base station. The DUALphone screen informs you when ready for next step.

Language

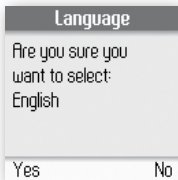

- ☐ Dansk
- ☐ Deutsch
- ☒ English
- ☐ Español
- ☐ Français

Select

- 2) Find your preferred language using , then press  to select a language.

Please notice:

At this step you might be disturbed by a **Firmware update** procedure. Please see **note 1** on page 10.

- 3) Confirm your selection by pressing .

- 4) Choose **Sign in to Skype** or **Create new account** by pressing  or  .
Please notice:

You will not see this screen if another handset registered on the base already is signed in to Skype. In this case you return directly to the idle screen and the handset is ready for use.

If your landline base is not configured a wizard will guide you. Please see **Installation Guide** for further instructions.

Note 1

The Firmware update appear if your new DUALphone handset is provided with an older firmware vision. The Firmware update might display later on, since your new handset needs time to synchronize with the base station. A black screen with the text »Writing 0-100%« will also be displayed during the Firmware update. This procedure may take up to 15 minutes.

If your new DUALphone handset does not display Firmware update, please proceed to step 2 and 3.

Notes:

-
- The country settings configure the landline telephony port.
 - If your country settings is not configured correctly, emergency calls may not work properly.
 - Emergency calls via the landline are only possible if power is applied to the base station and the landline is properly connected.
