INTRODUCTION

Congratulations on purchasing your Geemarc GSM CL8400BT telephone. This telephone is also hearing aid compatible. It offers many functions such as an alarm, a calendar, SMS text messaging, a phone book, a call record, a speakerphone and speed dial buttons. It has an emergency function in which six numbers can be programmed as emergency contacts. In case of emergency these contacts will be called and SMS messages sent with the flick of just one switch.

The font size on the colour LCD display is large and the buttons on the keypad are easy to see and use. This mobile telephone has a loud ringer and strong vibrating setting. All these features add up to make this a highly suitable telephone for the elderly, hard of hearing or sight people and anyone who simply wants to keep in touch with a great degree of ease.

It is important that you read the instructions below in order to use your Geemarc telephone to its full potential. Keep this user guide in a safe place for future reference.

This guide explains how to use the following telephone: **GSMCL8400BT**

INTRODUCTION

Unpacking the Telephone

When unpacking the telephone, you should find the following in the box:

- 1 GSMCL8400BT mobile telephone handset
- 1 Desktop charging unit
- 1 Mains power adaptor
- 1 Li-Polymer rechargeable battery
- 1 User Guide

SETTING UP

Network Services

To use this mobile telephone you must subscribe to a service from a service provider. Different service providers offer different features (at a variety of charges). This may affect the features made available to you through this mobile telephone.

Passwords

This mobile telephone allows you to set up passwords to help protect your telephone from unauthorized use.

The PIN and PIN2 codes are supplied with your SIM card. The PIN code helps to protect the SIM card from unauthorized use. The PIN2 code is required to access certain services.

The PUK and PUK2 codes may be supplied with the SIM card. If you enter the PIN code incorrectly three times in succession, the PUK will be required. If the codes are not supplied, contact your service provider.

Install SIM Card and Battery

Always switch the telephone off and disconnect the charger before removing the battery.

Take care when handling the SIM card. The SIM card and its contacts can be easily damaged by scratches or bending.

SETTING UP

To remove the battery compartment cover, slide the cover in the direction shown and pull it off.

Remove the battery (if battery already inside).

Slide the metal SIM card cover down slightly and then lift up. The SIM card contacts in the phone should now be exposed. Place the SIM card with the gold coloured contacts face down into the SIM card compartment. Place the SIM card cover down and then gently push down and slide upwards until the cover and SIM card are held securely in place. A small click will be audible.

Observe the battery contacts (the gold coloured contacts must face towards the top left) and insert the battery.

Slide the back cover back until it snaps into place.

SETTING UP

Charging the battery

Charging via the Mini USB Port
Plug the charger into a wall socket.

Connect the lead from the charger into the Mini USB port on the bottom of the telephone (pull back the protective flap first). During charging, the battery icon starts to fill.

Charging via the Charging Unit
Plug the charger into a wall socket.

Connect the lead from the charger into the Mini USB port on the charging unit.

Place the mobile telephone onto the charging unit.

SETTING UP

Note: Only use batteries and chargers supplied with the telephone. The guarantee will be invalid if an unapproved cable is used. Keep the battery contacts clean and free of dirt. Try and avoid removing the battery as this could short circuit the battery.

If the battery is completely discharged, it may take a few seconds before the charging indicator appears on the display or before any calls can be made.

Before the handset is first used, the battery must be charged for a minimum of 4 hours.

Switching On/Off

Press 🔘 for 3 seconds or longer to switch the telephone on.
If no SIM card is inserted in the cellular phone, a message that Insert SIM is displayed in the standby mode. In this case, only emergency calls can be made.

If this is the first time the phone has been switched on with the SIM inserted, you will be prompted to enter the time and the date (use the numeric keypad).

Hold down 🔘 key for 3 seconds until the power off tone sounds, then the display disappears.

Note:
Nothing will appear on the LCD when battery power is very low. YOU SHOULD FULLY CHARGE THE PHONE BEFORE USING.

Battery Use

The 📶 icon is continuously displayed at the top right corner of the LCD display. The icon indicates the level of battery power. The more bars displayed, the more power available.

When the battery charge is low, a warning message will be displayed **'CHARGE THE BATTERY'**. The back lighting and certain other functions may stop working. When the battery is too weak for the telephone to operate, the handset will automatically switch off.
Battery talk and standby times are subject to change. Replace the battery when the battery power has deteriorated noticeably (requires charging more frequently).

USING THE TELEPHONE

Standby Mode

When the telephone is ready for use and you have not entered any characters, the telephone is in standby mode. You can set the telephone to standby mode by pressing ⟨☏⟩.

Making a Call

Flip open the cover and dial the number on the keypad.

Press **CLEAR** soft key to delete an incorrect digit.

Press ⟨✆⟩; the number is automatically dialled.

To end the call, simply press ⟨☏⟩.

USING THE TELEPHONE

Making a Call from the Call Record

You can find numbers dialled, received or missed in the call record.

Press $\boxed{\mathcal{C}}$ to enter the call record.

Use ∧ or ∨ to scroll through the lists available.

Press **OK** soft key to select the required list.

Use ∧ or ∨ to scroll through the telephone numbers.

On finding the desired number, press $\boxed{\mathcal{C}}$; the number is automatically dialled.

To end the call, simply press $\boxed{\text{☎}}$.

Making a Call from the Phone Book

If you have stored numbers in the phone book, you can dial numbers using the phone book.

Press ∧ to enter **BROWSE**.

Use ∧ or ∨ to scroll through contact names in the phonebook.

USING THE TELEPHONE

On finding the desired name, press [📞]; the number is automatically dialled.

To end the call, simply press [🔴].

Making a Call using Quick Dial

If you have stored numbers in the quick dial locations, press either M1, M2 or M3 (dependant on who you wish to ring). The chosen telephone number will be dialled automatically.

Making a Call from the Dialled Numbers List

Press [📞] to display the outgoing call list.

Use ⏶ or ⏷ to scroll through the list and find the desired number.

Press [📞] again; the number is automatically dialled.

Receiving a Call

When an incoming call is received the telephone rings and the small white LED will flash. If the Caller ID service is activated, the caller's telephone number will be

displayed. If this caller's number is stored in the Phonebook, the associated name will be displayed.

Press ☎ to answer.
To end the call, simply press ⏻ or flip the cover closed.

Rejecting a Call

To reject an incoming call, simply press ⏻ or the soft key **REJECT**.

Amplification Function

Your phone is equipped with a specialized amplification function designed to fit your needs. During a conversation you can use the 🔊 or 🔉 key and the 🔄 key on the left side to adjust the receiver volume.

You can also press the 🎼 control on the right side of the phone repeatedly to fit the levels to your hearing requirements. The selected level will be displayed on the LCD (up to 5 levels).

When you press the [⏻] key in receiver mode during a conversation, the Amplifier indicator on the handset lights on. If you press the [⏻] key again, the indicator will go out.

Please note that the phone will retain the current sound levels (Amplify on or Amplify off) automatically.

USING THE TELEPHONE

Options During a Call

You can use a variety of functions during a call by
pressing the **OPTION** soft key.

Hold Single: Hold the current call.

End Single: End the current call (same as 🔻).
New Call: Call another number (three-party call).
Phonebook: Search the phonebook.
Message Center: Write or read messages.
Mute: Disable the microphone (mute).
DTMF: Enable the user to dial the extension number.

Handsfree Function
During a call, you can press H-Free to activate handsfree
mode, which allows you to speak without holding the
phone.
Press H-Held to return to normal mode.
Note: Before putting the handset to your ear, please
ensure you have switched the speakerphone off.

To adjust the volume, press the 🔊 or 🔊 key on the
left side of the phone repeatedly.

SMS

Writing/Sending/Storing a new message

You can create a text message containing up to 160 alphanumeric characters and send it. To do this, proceed as follows:

1. Press **Menu** in standby mode.
2. Press **Ok** to select **Short Message**.
3. Press **Ok** again to select **Write Message**.
4. Enter the message text (up to 160 characters). Press the ⌨️ key to switch among different inputting mode while press **Clear** soft key to edit it. Then press **Options** to confirm, press **Ok** to choose:

Send - Send the message only.

Save and Send - Send the message and save it in Outbox.

Save - Save the message in the Outbox.

Send To Many - Add more recipients for the message.

Send By Group - Add a whole group for the message.

If you have previously selected **Send** or **Save and Send** option, enter the phone number to which you want to send the message by using the keypad, or press **Search** to enter the phonebook in order to choose a desired entry. Press ▲ or ▼ key repeatedly to choose one, then press the **Ok**. Press Ok again to confirm and send the message. When the message is being sent, the display shows **Sent OK**, or it shows **Not Sent**.

SMS

Inbox

The Inbox stores the messages you have received. You can forward, reply, delete, edit these messages or store the sender's number to your phone or SIM card. When a new short message is received, the LCD display shows **1 New Message**, and you can press **Read** to open it.

1. Press **Menu** in standby mode.
2. Press **Ok** to select **Short Message**.
3. Press ∨ key to select **Inbox**, press **Ok**.
4. Select the desired message by using ∧ or ∨ key.

Unopened messages are marked with 🔲. Opened messages are marked with 📂. Press **Ok**.

5. You can access the following options by pressing **Options**:

Reply - To send a reply to the selected message.

Delete - To delete the selected message.

Edit - To edit the selected message.

Forward - To send the received message to another person.

Copy to SIM - To copy this message to SIM card.

Move to SIM - To move this message to SIM card.

Delete Inbox - To delete all the messages in the inbox.

Copy All - To copy all the messages in the inbox to SIM card.

Move All - To move all the messages in the inbox to SIM card.

Use Number - To extract the sender's number and store it to the phone or SIM card.

SMS

Outbox

The Outbox stores successfully sent and saved messages.

1. Press **Menu** in standby mode.
2. Press **Ok** to select **Short Message**.
3. Repeatedly press ▲ or ▼ key to select **Outbox**, press **Ok**.
4. Select the desired message by using ▲ or ▼ key, press **Ok**. The display will show the whole message.
5. You can access the following options by pressing **Options**:

Send - To send the selected message.

Edit - To edit the selected message.

Delete - To delete the selected message.

Copy to **SIM/Phone** - To copy this message to SIM card or your phone.

Move to SIM/Phone - To move this message to SIM card or your phone.

Delete Outbox - To delete all the messages in the outbox.

Copy All - To copy all the messages in the outbox to SIM card.

Move All - To move all the messages in the outbox to SIM card.

Use Number - To extract the sender's number and store it to the phone or SIM card.

SMS

Template

The template folder stores 9 commonly used expressions. You can also edit them according to your needs.

1. Press **Menu** in standby mode.
2. Press **Ok** to select **Short Message**.
3. Repeatedly press ▲ or ▼ key to select **Template**, press **Ok**.
4. Select the desired expression by using ▲ or ▼ key, press **Options**.

Edit - To edit the selected sentence.

Erase - To erase the selected sentence.

Write Message - To quote the sentence to write message.

Message Settings

You can set various options for Message center number, Message validity, Delivery reports, Reply via same centre and Cell info display.

1. Press **Menu** in standby mode.
2. Press **Ok** to select Short Message.
3. Repeatedly press ▲ or ▼ key to select **Message Settings**, press the **Ok**.

Profile Setting
Up to 4 types, from **Profile 1** to **Profile 4** are available.

Common Setting
Delivery Report

Reply Path: If you activate this feature, when you reply to messages, your message usage is charged to the recipient's service account instead of yours.

Memory Status
You can check the number of messages stored in the SIM card and the phone. For example, SIM:70.00%, PHONE:20.00%.

Preferred Storage
You can set the short message storage mode. If you select **SIM** option, when you receive a new short message, it will be stored in SIM card by default. When the memory of SIM card is full, new messages will be stored in the phone. Otherwise new messages will be stored in the phone firstly.

PHONE BOOK

The phonebook built in your mobile phone allows you to store frequently used numbers so that you can easily make a call without having to remember or enter the phone number.

Adding Phonebook Entries

You can add phonebook entries by using the menu or in standby mode.

Way 1: by using the menu
1. Press **Menu** in standby mode.
2. Press ∧ key to select **Phone Book**, press **Ok**.
3. Press ∨ key to select **Add New Entry**, press **Ok**.
4. Press ∧ or ∨ key to select an option between **To SIM** or **To Phone**, press **Ok**.
5. Press **Edit** soft key. Enter a name that you want to use, press **Save** soft key. For details please see the Character Map.
6. Press ∨ key to move to number field, enter the appropriate number (up to 40 digits), press **Ok**.
7. After that, press **Yes** to save, then the LCD display shows **Done**. Press **No** to cancel and quit.

Notes:
- In step 5, to switch among different inputting mode,

  press the 🔤 key while entering the text.
- If you make a mistake while entering a number or a name, press **Clear** soft key to delete the last character.

PHONE BOOK

Way 2: in standby mode
1. Enter a phone number while in standby mode and then press **Save**.
2. Complete the storing of the entry by starting from step 4 described in Way 1.

Character Map

To enter a specific alphanumeric character, press one or more times the relevant key for the required character according to the following table: once for the first character, twice for the second and so on.

Key	Characters in the displayed order
	ABC
0	(spc) 0

TROUBLESHOOTING

Telephone cannot be switched on.
- Check battery is inserted and check that it is inserted correctly.

Nothing appears on the display.
- Check the handset is switched on.
- Check the battery and SIM are inserted correctly.

Display is locked when the telephone is switched on
- Enter the PUK to unlock the SIM.

No signal icon is displayed.
- There is no network connection. Move around to try and get to an area where there may be coverage.
- Contact your service provider.

Message to say that a function is not possible
- Your service provider might not provide the function in question or you may need to subscribe to that service.
  Contact the service provider.

No display during the charging process
- The battery charge is very low. Wait a few minutes.

"Insert Sim" or "Limited Service" message is displayed.
- Ensure the SIM is inserted correctly.

The battery is discharged quickly or cannot be charged at all.
- Charge the battery for 4 hours.

- Place the phone correctly in the charging unit or connect the charging unit properly. Clean the contact surfaces on the mobile phone and charging unit with a soft, dry cloth.
- Try a new battery.

Failure to link to the network

- The signal is too weak, or there may be some radio interference.
- Is the SIM card installed incorrectly or damaged? If the SIM card is damaged, please ask your service provider for a replacement.

Cannot make a Call.

- Is the SIM card registered to the network?
- Is the bar outgoing calls feature enabled?
- There may be a problem with the network, call your service provider.
- Check the service provider number, local area number or NMC number (see Handset Settings).

Cannot answer a call.

- Is the bar incoming calls feature enabled?
- Is the call diverting function enabled?

The keys appear to be locked.

- Power the phone off and then on.

Caller Number is not displayed.

- Ensure you have subscribed to the Caller ID service. Contact your service provider.
- The caller may have withheld their details.

TROUBLESHOOTING

- Let the phone ring a few times as there may be a delay in receiving the Caller ID information.

Any problems not referred to above

- Check through the User Guide.
- Power off and then on again. Check to see if the problem persists.

SAFETY INFORMATION

General

Only use the power supply included with the product.
Only use the approved rechargeable battery supplied.
Do not open the handset (except to replace the handset batteries) or base. Contact the helpline for all repairs.
Never dispose of batteries in a fire. There is a serious risk of explosion and/ or the release of toxic chemicals.
If you are sure you are not going to use the telephone for over a month, remove the battery.

Cleaning

Clean the telephone with a soft cloth. Keep the base and handset charging contacts clean. Never use polishes or cleaning agents - they could damage the finish or the electrics inside.

Environmental

Do not expose to direct sunlight.
Always ensure there is a free flow of air over the surfaces of the telephone.
Do not place any part of your product in water and do not use it in damp or humid conditions e.g. bathrooms.
Do not expose your product to fire or other hazardous conditions.
The telephone is designed for working within a temperature range of -20°C to 60°C.

Usage

In summary, read these simple guidelines. Not following them may be dangerous or illegal.
SWITCH ON SAFELY
Do not switch the device on when wireless phone use is prohibited or when it may cause interference or danger.

SAFETY INFORMATION

ROAD SAFETY COMES FIRST
Obey all local laws. Always keep your hands free to
operate the vehicle while driving. Your first consideration
while driving should be road safety.
INTERFERENCE
All wireless devices may be susceptible to interference.
This could affect performance.
SWITCH OFF IN HOSPITALS
Follow any restrictions. Switch the device off near
medical equipment.
SWITCH OFF IN AIRCRAFT
Follow any restrictions. Wireless devices can cause
interference in aircraft.
SWITCH OFF WHEN REFUELLING
Do not use the device at a refuelling point. Do not use
near fuel or chemicals.
SWITCH OFF NEAR BLASTING
Follow any restrictions. Do not use the device where
blasting is in progress.
USE SENSIBLY
Use only in the normal position as explained in the
product documentation.
BACK-UP COPIES
Remember to make back-up copies or keep a written
record of all-important information.
CHARGING
Do not use the telephone during charging

To prevent possible hearing damage, do not
listen at high volume levels for long periods.

HEARING AID INFORMATION

Some phones are measured for compatibility with hearing aids. If the box for your particular model has "Rated for Hearing Aids" printed on it, the following explanation applies. When some mobile phones are used near some hearing devices (hearing aids and cochlear implants), users may detect a buzzing, humming, or whining noise. Some hearing devices are more immune than others to this interference noise, and phones also vary in the amount of interference they generate. The wireless telephone industry has developed ratings for some of their mobile phones, to assist hearing device users in finding phones that may be compatible with their hearing devices. Not all phones have been rated. Phones that are rated have the rating on their box or a label on the box. The ratings are not guarantees. Results will vary depending on the user's hearing device and hearing loss. If your hearing device happens to be vulnerable to interference, you may not be able to use a rated phone successfully. Trying out the phone with your hearing device is the best way to evaluate it for your personal needs.

NETWORK SERVICES

To use the phone you must have service from a wireless service provider. Many of the features in this device depend on features in the wireless network to function. These network services may not be available on all networks or you may have to make specific arrangements with your service provider before you can utilize network services. Your service provider may need to give you additional instructions for their use and explain what charges will apply. Some networks may have limitations that affect how you can use network services. For instance, some networks may not support all language-dependent characters and services.
Your service provider may have requested that certain features be disabled or not activated in your device. If so, they will not appear on your device menu. Your device may also have been specially configured. This configuration may include changes in menu names, menu order and icons. Contact your service provider for more information.

GUARANTEE

From the moment your Geemarc product is purchased, Geemarc guarantee it for the period of one year. During this time, all repairs or replacements (at our discretion) are free of charge. Should you experience a problem then contact our help line or visit our website at www.geemarc.com. The guarantee does not cover accidents, negligence or breakages to any parts. The product must not be tampered with or taken apart by anyone who is not an authorized Geemarc representative. The Geemarc guarantee in no way limits your legal rights.

IMPORTANT: YOUR RECEIPT IS PART OF YOUR GUARANTEE AND MUST BE RETAINED AND PRODUCED IN THE EVENT OF AWARRANTY CLAIM.

Please note: The guarantee applies to the United Kingdom only.

DECLARATION: Geemarc Telecom SA hereby declares that this product is in compliance with the essential requirements and other relevant provisions of the Radio and Telecommunications Terminal Equipment Directive 1999/5/EEC and in particular article 3 section 1a, 1b and section 3. The telephone does not operate if the line current is lower than 18 mA.

The declaration of conformity may be consulted at www.geemarc.com.

$\mathsf{C}\mathsf{E}$

GUARANTEE

Electrical connection: The apparatus is designed to operate from a 230V 50Hz supply only. (Classified as 'hazardous voltage' according to EN60950 standard). The apparatus does not incorporate an integral power on/off switch. To disconnect the power, either switch off supply at the mains power socket or unplug the AC adaptor. When installing the apparatus, ensure that the mains power socket is readily accessible.

RECYCLING DIRECTIVES

The WEEE (Waste Electrical and Electronic Equipment) has been put in place for the products at the end of their useful life are recycled in the best way.
When this product is finished with, please do not put it in your domestic waste bin.
Please use one of the following disposal options:
- Remove the batteries and deposit them in an appropriate WEEE skip. Deposit the product in an appropriate WEEE skip.
- Or, hand the old product to the retailer. If you purchase a new one, they should accept it.

Thus if you respect these instructions you ensure human health and environmental protection.
