

MB 660 UC MS

MB 660 UC MS is a wireless, Skype for Business Certified, adaptive ANC headset designed for knowledge workers demanding business-grade communication and premium sound quality for maximum productivity in open offices.

Sound leadership

Adaptive Active Noise Cancellation

Focusing on your work without being disrupted or distracted by your colleagues or other sources of noise has become a serious challenge in an open office environment. Sennheiser's NoiseGard™ hybrid adaptive active noise cancellation technology constantly monitors the background environment for ambient noises and adjusts the level of noise reduction in your headset. This unique technology enables you to take control of your sound environment so you can have a productive, disruptionfree workspace.

Business-grade communication SpeakFocus™

Striving to be heard in a noisy environment can make communication inefficient and stressful. And in business, clear communication is crucial. SpeakFocus™ technology, with 3 digital microphones,

delivers crystal clear sound, making it easy for listeners to hear what you're saying – even in noisy open offices, so your call time is always effective.

Advanced Own-Voice-Detector

Reducing background noise doesn't mean compromising on the quality of your own voice. Sennheiser's Advanced Own-Voice-Detector continuously monitors the environment to determine whether your voice is present or not. When your voice is detected, it reacts immediately to provide optimal speech intelligibility while simultaneously reducing background noise.

WindSafe™

Windy days can be a call killer when conversations need to take place outdoors. Sennheiser WindSafe™ technology ensures the clearest possible sound is sent to your listener by reducing wind noise using advanced digital signal processing, combined with a specially designed wind screen "rosette". Because wind passes by without causing turbulence, your voice is easily heard, without background disturbance.

Sennheiser signature sound

Relaxing between calls is an effective way to reduce stress during long, busy

workdays. To get the best, personalized sound for speech, music and entertainment from your headset, MB 660 UC MS delivers Sennheiser's respected high-quality stereo audio, and CD-quality streaming with aptX®. With a choice of sound effect modes (Club, Movie, Speech, Director), you can create your own personalized sound profile.

Quality design

Sennheiser craftsmanship

Looking good is important in business and the MB 660 UC MS represents the best in quality materials and comfort. Discreet and elegant use of polished and brushed metals and fine, soft leather ear cups combine with a compact and foldable design for portable style and maximum comfort. Its built-in microphones maintain the streamlined style. You can expect the best in both performance and comfort with the MB 660 UC MS.

Ergonomic design

A professional headset simply has to be comfortable – especially for long-term users. The comfortable fit of the MB 660 UC MS gives you longer listening without fatigue. Ear-shaped ear cups provide the best in comfort and the foldable design of the headset makes it easy to wear around your neck when the headset is not in use.

User focus

Skype for Business Certified

The MB 660 UC MS comes with a Skype for Business Certified BTD 800 USB ML dongle for PC. It comes pre-paired, so you can simply plug n' play with your MB 660 UC MS. With full call control optimized for Skype for Business, you can answer/end, mute, hold, reject and redial with a simple swipe or touch of a fingertip directly on the touch pad. When it comes to security, the BTD 800 USB ML exclusively supports audio (no data exchange is possible) – making it very secure for businesses.

TalkThrough

Hearing announcements or the voices of nearby colleagues who need to speak to you is often a hassle and involves taking off your headset to hear properly. Not with MB 660 UC MS though: With Sennheiser TalkThrough technology, you can listen to your colleagues or keep an ear open for announcements – all without removing your headset.

Battery time

MB 660 UC MS features up to 30 hours of battery time. Even if it runs out of battery, you can still enjoy using the headset with the included audio cable.

CapTune App

Personalize and customize your audio profile – get personal with your music and find your perfect sound on your MB 660 UC MS. You can also adjust the adaptive active noise cancellation level to suit your individual needs.

Portability

MB 660 UC MS comes with discreet, compact and foldable design with all accessories you need in a premium quality carrying case.

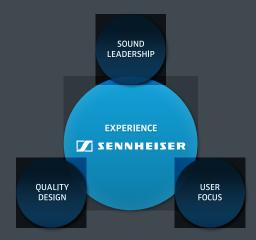

Features and Benefits:

- Certified for Skype for Business –
 MB 660 UC MS headset and included
 PC dongle BTD 800 USB ML are Certified for Skype for Business.
- NoiseGard™ hybrid adaptive active noise cancellation – constantly monitors the background environment for ambient noises and adjusts the level of noise reduction in your headset.
